**AMSOIL is the only oil company that...**

**"Recommends 25,000 mile oil changes"  
"Gives up to four times better wear protection"  
"Warranties your engine against oil related failure"**

**Fantastic Fuel Economy....**Are the price increases in fuel taking a big bite out of your bank account or the bottom line of your business? AMSOIL Synthetic Oil and lubricants will help you reduce your fuel costs by an average of 4-10% and in some cases even more. AMSOIL Synthetic Oil will increase the efficiency of your vehicle and at the same time give it unsurpassed protection. So get the best possible gas mileage from your everyday car, your farm equipment, or your fleet of trucks. See how much you can save at the links below. WARNING! Since the gas crunch there have been some bogus gas saving devices being heavily marketed. One such device is a magnetic resonator for \$89.99 that straps on to the fuel line. It's a fake technology. A rip-off! Beware! Magnets are NOT a magical cure for everything and especially your gas mileage. Only a reduction in weight of the vehicle or increased efficiency of the engine and drive-train will achieve increased fuel economy

**1972...** First to develop an API rated 100% synthetic motor oil. AMSOIL revolutionized the industry with the first synthetic motor oil in the world to pass API standards for passenger vehicles.

**1972...** First to introduce the concept of "extended drain intervals" with a recommended 25,000 mile/12-month drain interval. And AMSOIL backed it's customers with a Warranty.

**1973...** First to manufacture a 100:1 pre-mix synthetic 2-cycle oil. AMSOIL introduced the first synthetic 100-1 2-cycle oil. AMSOIL Synthetic 2-Cycle Oil shattered the industry's standards with its economical mix ratio.

**1974...** First to manufacture synthetic gear lube for automotive use. AMSOIL introduced the world's first synthetic gear lube for general automotive use. Providing customers long lasting wear protection and fuel economy.

**1976...** AMSOIL formulated a multi-purpose grease with a new synthetic base. The synthetic grease was a breakthrough for AMSOIL and for the industry.

**1979...** First to produce synthetic motor oils for diesel engines and marine engines. AMSOIL introduced the first synthetic multi-grade diesel oil.

**1980...** First to manufacture a synthetic automatic transmission oil for automotive use. AMSOIL introduced the world's first synthetic automatic transmission fluid for general automotive use. Most oil companies still have not developed one.

**1982...** AMSOIL developed an oil filter that set new standards for motor oil filtration. By removing virtually all wear-causing contaminants to 1/10th micron, the AMSOIL By-Pass Oil Filter helps engines last longer and require fewer repairs over their service life.
